

FRAGILE

A paradoxical and strange story about the fragility of the human condition

Synopsis: The awareness of our Fragility is very powerful, because it makes us aware of the value of others, of the value of little things, of the value of life.

FRAGILE

Fragility reveals what really matters.

It is a story based on personal experience, explained as a metaphor to reach the life experience of many people.

A paradoxical and strange story about the fragility of the human condition. A poetic and metaphorical passage, through the story and the representation of two worlds: the outside world (the body, the visible, the disease...) and the inner world (the struggle for balance and survival).

Life is a gift, live it, dance it.
